

Buyback of ATMs and Spare Parts

Exatec ATM buys about **2 000 ATMs** yearly and **hundreds of Spare Parts**. After delivery, all machines and parts are identified, and depending on the models and the quality, we dismantle the machines for parts, or renew them as whole ATMs. We mainly buyback **ATMs** and **Cash Dispensers**, but also **Kiosks** and even deposit machines, safes, TCD, TCR, Coin Rolls Dispensers...

Exatec ATM buys ATMs:

- **De-installed** after normal use,
- **vandalized** or **damaged**,
- **new**, on overstock or after modification of selected models, or due to technical problems for homologation.

We buy from **one single unit** to withdraw in emergency, till **several hundreds of units** planned for the several years. In the cases of replacing programs on mid-term or long term, the unit price will be given in advance, **quarter per quarter**, or for each **semester**.

Logistics is managed by Exatec ATM and its cost is included in our global charges. *Exatec ATM* has signed partnership agreements that make us able to offer **de-installation from the fields**. Contact us to confirm the conditions related to your country.

Usually, the ATMs **are available on a logistic platform**, machines being on pallets, ready for shipment. You can find all the details in our **general conditions**, available on request.

The **buyback price** is not linked to the year of manufacturing but depends on :

- the **model of ATM**,
- the **technical configuration** : type of reader, PC, keyboard, monitor, deposit...
- the **type of safe** : a heavy safe is more expensive for the transport as well as the final destruction.
- the **upgraded modules** installed in the last 5 years : new PC, reader, keyboard...
- The **non-standard options** are usually lowering the price such as ink mechanism, a specific color or PC, alphanumeric keyboard...
- The **number of ATMs** will help to determine the transport expenses per ATM. The unit cost usually varies from 50 euros to 500 euros per ATM.

Exatec ATM buys back ATMs from :

- **banks**,
- **deployers**,
- **manufacturers** and **resellers** when they sell brand new ATMs to replace the used ones, or for overstocks to sell,
- other **partners** and **brokers**.

Our procedures do comply with the European regulations regarding waste management and give full satisfaction to our suppliers in addition to an **important income**.

Exatec ATM buys back sets of parts in the following cases:

- **new parts overstocked** after rollout,
- **used parts** withdrawn after rollout of new models,
- **defect parts** withdrawn by the maintenance.
