

Buyback General Conditions

The following conditions establishes **the global terms of an ATMs sale/purchase** between *Exatec ATM* and its supplier. If some detailed parts described hereunder are not corresponding with the state of the proposed machines, the supplier has to inform *Exatec ATM* of each difference. The agreed purchasing price takes into the following conditions. **Each option not mentioned** in the present document **can be discussed and added** in appendix.

The proposed equipment have to be identified **per brand and model**.

If the providing of the equipment takes more than 3 months, the supplier has to advice *Exatec ATM* about it so that the price is confirmed on **the whole duration**, or modified by **quarter** or **half-year**.

The proposed equipment must be complete, and with original specifications. **The equipment is no longer under guarantee**; however it is in working condition at the time of its de-installation with **no serious vandalism nor damages** due to fire or water.

In addition, we will require all the elements needed to open the safes and electronic cabinets (keys and/or combinations). **The machines have to be complete**. The machines will be **on pallets** and **ready** for transport per truck or container. Transport cost of the machines will be at the Exatec's expenses from the point of collection.

As in our standard procedure with the banking companies, **Exatec ATM will destroy all confidential or secured information** that can be found in the machines, as encrypted data as well as technical or administrative data.. The **software and any data** in the machines **are not part of the deal and will be returned or destroyed**.

This equipment can be resold by *Exatec ATM*, partially or entirely, following our usual business model. The machines to be destroyed will be managed with a **selective sorting** and will be hanled by our authorized recycling partners according to the **European Regulations**.

After delivery of the machines, Exatec ATM will inform its supplier within 10 days to indicate the exact number of ATMs, model per model, and to confirm if there is no litigation or to notice on the possible defects. On request, *Exatec ATM* can supply the inventory list according to the supplier's classification, including serial numbers or the names of the branches...

The **incomplete machines** (missing parts such as printer, PC, monitor, cassettes...) will be re negotiated if the missing pieces are not supplied within one month after notification. For the machines with a locked safe, the price will be reduced by 250 euros per machine, if the keys or combination are not supplied within one month after notification.

The supplier will produce **the final sales invoice** that will be the official document for its inventory book as well as the *Exatec ATM's* one.
