

Spare parts & technical consumables

Exatec ATM is well known for supplying **spare parts** for the maintenance and the upgrades, with **several hundreds of references** immediately available and **thousands of units on stock** for the main brands of the ATM market :

Exatec ATM proposes **all kind of modules** used in the ATMs :

- dispensers
- deposit modules
- printers
- readers
- PCs
- electronic boards
- power supplies
- operator interfaces
- keyboards
- cassettes
- fascias...

The requests we receive usually include the manufacturer's part number and the product's description. However, we can also identify the requested items from pictures or with the model of ATM and the type of module, thanks to our **technical skills**.

In any case, Exatec ATM has a huge **database** linking the manufacturer part numbers with the ones from our customers and suppliers and our own part numbers. Each product has an **Exatec ATM label** with our reference and our serial number to identify the part and apply our **warranty conditions**. This database gives **in real time** an update of the stock and its specific location in our **warehouses of 2 500 sqm (27 000 sqf)**.

Exatec ATM offers **several choices of quality**, depending on the future use and the budget :

- **New**, never used nor installed, tested with a short-term process, **3 months warranty period**
- **As New**, all consumables being replaced after an entire dismantling & deep cleaning, tested with a long-term process, **3 months warranty period**
- **Refurbished**, all used consumables being replaced, cleaning made without entire dismantling, tested with a long-term process, **1 month warranty period**
- **Working**, no new consumable, tested with a short-term process, **10 days warranty period**
- **As is**, products sold without any test, usually per quantity, without any visible damage, **no warranty**

Exatec ATM also supplies **technical consumables** to maintain or to repair the ATMs, such as **belts, rollers, gears, magnetic heads...** These consumables can be original or generic ones, always on **first class quality**, and used in our renewing and repairing processes.
